NAVTTTC

Feb 2022 – Aug 2022

Amazon Virtual Assistance

DigiSkills (Virtual Course)

Jul 2023 – Oct 2023

Languages

English – Fluent

Urdu – Native

Profile

Computer Science graduate and full-stack / mobile app developer (Flutter, Firebase, JavaScript) with hands-on experience monitoring app performance, resolving customer-reported technical issues, and coordinating between backend systems and end users. Able to independently triage whether an issue originates from the app backend, the server, or the user's device/network, and to communicate clearly with non-technical stakeholders. Comfortable working office-based, managing a live production app, and supporting order-taking and marketing app operations for a growing business.

Relevant Projects

Travel Wise – Tourism Planning Mobile App

Final Year Project

- Built a cross-platform mobile application using **Flutter** with a **Firebase** backend, covering authentication, real-time data, and location-based features.
- Handled end-to-end debugging of app issues, distinguishing between backend/database failures and device- or network-side problems, closely mirroring live production app support.
- → [View Repository on GitHub](#)

Amazon Repricer – Automation & Monitoring Tool

Personal Project

- Developed a **JavaScript**-based tool to automatically monitor and adjust listings, involving continuous performance checks and error handling against a live API.
- → [View Repository on GitHub](#)

Personal Portfolio Website

Personal Project

- Designed and deployed a responsive portfolio site (HTML/CSS), hosted and maintained on Netlify.
- → [View Live Site](#)

Work Experience

Account Manager

2023 – Present

E-Com Whizz

- Monitor day-to-day account and order performance, tracking key metrics to quickly identify irregularities or service issues.
- Oversee order placement and tracking end-to-end, resolving delivery delays and discrepancies reported by customers.
- Act as first point of contact for customer-reported issues, diagnosing whether problems stem from internal systems or external/customer-side factors before escalating.
- Analyze feedback and performance data to recommend and implement process improvements.

Customer Care Representative

2022 – 2023

MSS Logistic

- Provided prompt, friendly support across multiple channels, resolving customer inquiries and technical/service issues.
- Communicated clearly with customers to explain issues and next steps, maintaining a professional tone under pressure.

Why I'm a Fit

- Comfortable being the first point of contact for app users – diagnosing whether a reported problem is a back-end/server issue or a device/connectivity issue before escalating.
- Practical, hands-on experience building and debugging a live Flutter + Firebase mobile app end-to-end.
- Strong customer communication background – explains technical issues in plain language to non-technical users.
- Based in Lahore and available for office-based work.
